

Cosima Insurance - efficient and secure !

cosima
makes your business flow

Cosima was established in 1990 offering a new generation of administrative software. Our goal is to focus on your real value chains as well as on the resources to administer these. Cosima Insurance is developed to increase the effectiveness of your client portfolio and give the employees client information he/she requires.

All client details in one view !

Cosima Insurance can be extended with modules like accounting, damages and valuation in one totally integrated solution. Your users find any client details in simple dialogs also including historicals and status of ongoing issues. In addition you see the overall picture of the client and what value chains of your insurance business he/she are active on.

Cosima has delivered some 100 client-solutions based on our unique template solutions. Our references is your guarantee

Cosima Insurance is the markets most flexible insurance package serving both Agents and normal insurance business

Insurance

When the customer rings, you have 10-20 seconds to respond, in the correct way.

Challenge

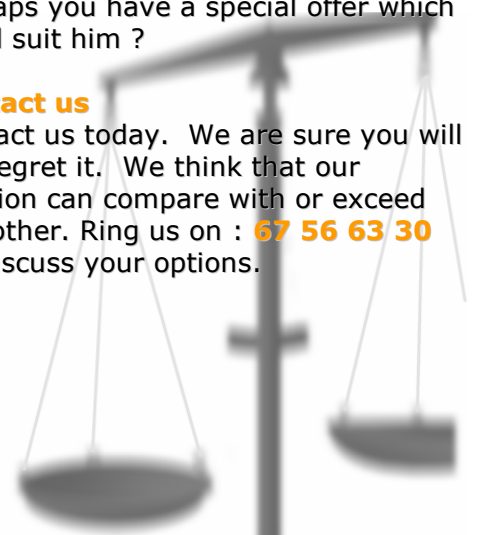

Most businesses have key information spread on several sub-systems. It therefore takes time to find the latest status of the customer. Is this customer good, bad, demanding or perhaps a priority customer? What are our possibilities with the customer?

Solution

Cosima Insurance gives you all information about the customer in one window. The customer's connections to all your value chains is shown, together with all details, statuses and all previous interactions. This optimises how your staff handle individual customers, giving the level of service that the customer deserves. Perhaps you have a special offer which could suit him ?

Contact us

Contact us today. We are sure you will not regret it. We think that our solution can compare with or exceed any other. Ring us on : **67 56 63 30** to discuss your options.

Why choose Cosima Insurance ?

We offer this package either as a standard- or as a template solution. The template can easily be adapted your demands to support your competitive differences. Normally this has been very costly, complex and time consuming to achieve. Today the technology is available making adoptions on software with full control on quality and result.

Cosima Insurance is optimal for businesses with unique demands to stay competitive in the insurance market. To adopt Cosima Insurance is a cooperation involving both management and ordinary users. This ease the training and overall usage in the startup and later adoptions.

Based on open IT standards !

Choose your technology :

* Windows-version and/or Internet

* **Database:** SQL Server, Sybase, Oracle, Informix, DB2, ODBC ...

What is a template-system ?

Our clients have experienced how important their core system is. When minor changes have been wished, costs and complexity in software stopped it. Cosima Insurance is either matching your demands 100%, when only 70-90% you are in need of Cosima Insurance Template. With our technology, based on open market IT-standards, adoptions are made in minutes when normally other vendors spend days and weeks.

Cosima Insurance is a total concept of improving your performance on all levels.
