

## Cosima Organisation - optimal fundraising !

**cosima**  
makes your business flow

Cosima was established in 1990 offering a new generation of administrative software. Our goal is to focus on your important value chains as well as on the resources to administer these. Cosima Organisation is developed to improve all your member-processes and give every employee and member their desired information.

### A new generation of organisation systems :

Our solution groups all the organisations activities, choices, finances and events into an integrated system. It gives a combination of CRM, Finance and activity management in a user-friendly solution. Each user employs simple dialog which gives control of and overview over all information connected to individual members, donors, subscribers and their agreements with your organisation.

### All member information in one place!

Cosima Organisation has additional modules such as Salary and Personnel, WebPortal and Webshop in an integrated total solution. Users find all customer information in dialogs which give an overview over all interactions and customer history, together with current status.

In addition, the member's agreements with your organisation (read value-chains) are shown, along with which value chains are effective.

Cosima has carried out over 100 software installations. Our references are your guaranty.

**Cosima Organisation is the markets most effective total solution for small and large member organisations.**

### Organisations

**Common targets for small and large organisations are low staffing levels combined with the need for high efficiency. The employee needs fast access to the right information.**

### Challenge

Most organisations have key information spread across many sub-systems. It therefore takes a long time to find information about for example, members or an activity. Is it possible to take part, where are the arrangements being held...

### Solution

Cosima Organisation gives you all the financial member information and status for your members, all in a single overview window. Members have links to their value-chains and are active members within a value-chain. It is easier to access participants, also in other value-chains in your organisation. This enables individual employees to know exactly how each member should be prioritised, so ensuring the member is handled in the correct way. Perhaps you have a special campaign which could suit him?

### Contact us

Contact us today, we can guarantee you will not regret it. We believe our solutions can compare with any other. Call us on **(+47)6756 6330** to discuss the options.

## Why Cosima Organisation ?

Cosima is the first software house which has developed a total solution for Member Organisation. It has all the important modules, such as fundraising, invoices, accounts, salary and personnel modules. This means that all data is gathered in one place, and is available to all users who have permission to see it. A member is registered in one place, and as required, can easily see all his key data as well as whether the member is an active participant / donor.

Cosima Organisation is optimised for fundraising. It is possible to save all given searches such that all electronic searches can be saved and re-searched.

## Based on open IT standards !

Choose your technology :

\* Windows-version and/or Internet

\* Database: SQL Server, Sybase, Oracle, Informix, DB2, ODBC ...

## What is an Template ?

Our clients have experienced how important an administration system is. They have felt the need for small and more comprehensive system changes, but have been locked in to their system. A template is 70-90% complete in regard to its matching a client's demands. With our extremely effective tools, which are based on Microsoft's standards, modifications can be made in minutes, where it would normally have taken days or weeks. We offer tailor-made Modifications when special situations occur due to increased productivity, at very affordable rates.
